DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-12, drawn to a vehicle accessory component display and control system, classified in class 701, subclass 36.
- II. Claims 13-20, drawn to an object avoidance and automatic driving control system, classified in class 701, subclass 301.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention I has separate utility such as an interactive control display for vehicle accessories, which is not necessary in a vehicle cruise control and obstacle avoidance system. See MPEP § 806.05(d).
